Forecast for Sunday 17 Nov 2024

Weather: A mixture of bright spells during the morning with occasional showers, wintry over the summits. Cloud increases and lowers in the afternoon with showers merging into longer outbreaks of rain, heavy at times.

Chance of cloud-free hill tops above 800m: 70% becoming 20% in the afternoon.

Low Cloud and visibility: Occasional cloud around the summits at first, becoming extensive, base 400-600m during the afternoon, perhaps with patches down to 300m or less at times. Visibility good or very good at first becoming mainly moderate to very poor in rain and low cloud through the afternoon and evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling cold when exposed to the wind.

Forecast for Monday 18 Nov 2024

Weather: Cloudy with further rain and drizzle overnight, heavy at times. Perhaps a brief drier spell during the morning, but outbreaks of heavy rain returning late morning through the afternoon and evening. This is now looking likely to turn to snow on higher summits, with a risk of blizzard conditions here later in the day.

Maximum wind: Quite light around the middle of the day, becoming Southeast 30 to 40mph gusting 50-60mph later.

Chance of cloud-free hill tops above 800m: 60% becoming 20% from late morning.

Low Cloud and visibility: Occasional or patchy cloud base 600 to 900m, becoming extensive from late morning base 400-500m, occasionally down to 200-300m. Visibility mostly moderate to very poor.

Temperature: **Valleys:** Zero Celsius becoming Plus 4 Celsius
At 800m: Zero Celsius to Plus 2 Celsius
Freezing level: Near the summits, perhaps lowering 600-800m.
